				Glasses	Gloves
				Mask	Hearing Protection

Basic Required Tools

None

Part Weight (Gross)

5.29	lbs
2.40	kg

FMVSS 110 Compliance Information

All dealers must determine if the weight they have added in the form of all options or accessories, when added to the weight of all Port/Dealer installed options or accessories, exceeds the lesser of 1.5% of GVWR or 100 lbs. If the additional weight does exceed the lesser of the indicated thresholds, a "Load Carrying Capacity Reduced" label must be installed. A black, fine-point, indelible marker must be used to write by hand onto the label, the reduced carrying capacity in kilograms or pounds, which is the total weight of all added options and accessories.
Load Label Part Number: NP070 - 09003

Warning! Ensure that each All-Season Fitted Liner is securely attached to the vehicle's floor mat anchor(s) before driving the vehicle. This helps keep the All-Season Fitted Liner from sliding forward. If the All-Season Fitted Liner slips and interferes with the movement of the pedals during driving, it may cause an accident.

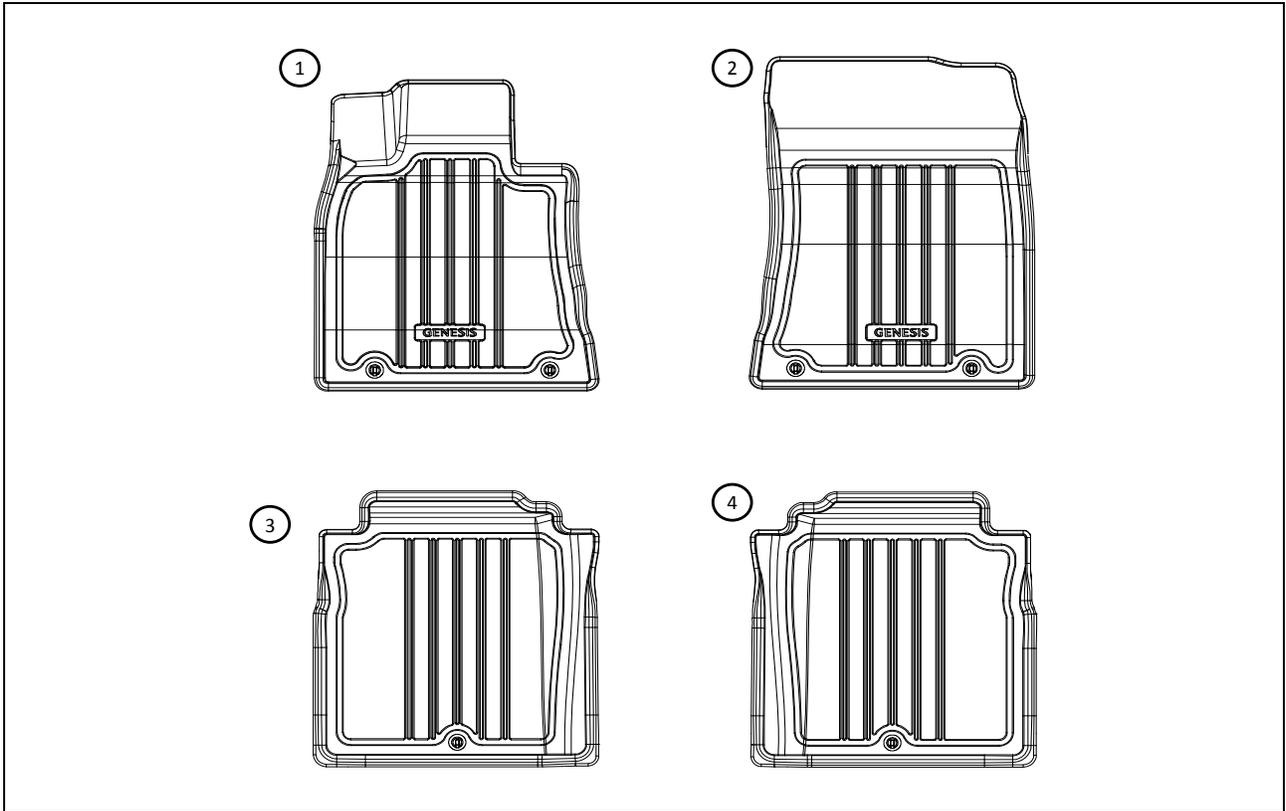

Do not put an additional Floor Mat on top of the anchored All-Season Fitted Liner, otherwise the additional mat may slide forward and interfere with the movement of the pedals.

Notes to the installer:

- 1 Dealer must clearly advise customer of installation method.
- 2 Before installing, verify and identify all parts.
- 3 Remove vinyl factory covering from carpeted areas before installation.
- 4 Sliding driver and passenger seats to furthest rearward position provides better access to install front All-Season Fitted Liners properly.
- 5 When removing mats or liners, be sure to hold grommet and mat/liner at the same time, then pull forward.

Care & Cleaning

Put this page in the customer's glovebox, for future reference.

Cleaning Instructions for:

G90

All-Season Fitted Liners

Each All-Season Fitted Liner can easily be cleaned using a vacuum, soft cloth, or soft brush.

To remove excess dirt, use water with a mild detergent to clean the liner. Do not use bleach or alcohol to clean the liner or the liner may become damaged or discolored.

Dry the liner with a soft cloth or place the liner in a well ventilated area to dry before reinstalling. If the liner is installed before it is completely dry, it could become moldy or emit an abnormal smell.

Do not place the liner on the ground where it is in direct contact with the sun, or the liner could deform from high temperatures.

Do not use a washing machine or automatic mat cleaner to clean the liner. The liner could become damaged and/or deformed.
